General

- Compatible with Magento 1.6.x.x, 1.7.x.x
- PSD, Fonts files supplied
- Cross Browser Support

Installation & Configuration

Thank you very much for purchasing! In this document you will find all the information about how to setup and configure this theme in your Magento Installation.

System Requirements

Holiday only supports Magento Community Edition 1.6.x.x and 1.7.x.x which can be downloaded from http://www.magentocommerce.com/download.

It does not support Magento Enterprise Edition and Magento GO. Before downloading Magento, make sure you meet the system requirements and test the compatibility of your server.

For help with installing Magento, please refer to the following links:

- Magento System Requirements

- Server Compatibility Check

- Magento Installation Guide

Uploading Holiday

Before you begin the installation process, we recommend to backup your Magento installation and database.

- Unzip downloaded folder "Holiday".
- Upload / Copy all files / folders from folder "Magento Files" to your Magento root directory, if you are using Mac, please make sure you are merging and not replacing Magento directory.

Make "Holiday" your theme

- Login to the Magento Admin Panel.
- **Go To:** 'System → Configuration' Click on **Design** on the left menu
  - » Under Package Tab put "**holiday**" into current package name
  - » Under Header tab put "**images/logo.png**" into 'Logo image Src' Field
  - » You can also enter the Image alter text and Default Welcome Text
- Scroll back to the top of the page and click the **Save Config** button
- Next, go to 'System > Cache Management' from the top navigation menu. You will need to clear the store cache and all cookies.
- Click the following buttons (in orange): Flush Magento Cache, Flush Cache Storage, Flush JavaScript/CSS Cache, and Flush Catalog Images Cache (optional). Now you are ready to add content to your website.

    ```
    <div class="customized">
    <h3 class="medium">Customized Area</h3>
    <div class="best_theme">
    <h4 class="medium">Looking for the best theme?</h4>
    <div class="theme_image"><img src="{{media url="wysiwyg/category-banner/home-right.jpg"}}"
    alt="" /></div>
    <a class="button" title="best theme" href="#"><span class="small">View More</span></a></div>
    </div>
    ```

- **Featured Products**

You need to set 'Yes' in fields "Featured" for the products you want to display   as   Featured Product on home page

Note: *for Featured product first off all you need to create an attribute.*

» **Step for creating attribute**

Go to: 'Catalog → Attributes → manage Attributes' click on "Add New   Attribute" from Right Corner

Set the following option under 'Attribute Properties' Tab

Attribute code > promotion
Scope   > Global
Catalog input type for store owner   > yes/No
Apply To   > all product types

After that click on "Manage Label/Options" from left corner

Set following option under 'manage Titles' tab

Admin > Featured(you can set anything as you want to display)

After that click on "Save Attribute" from the top of the page

» **Step for apply attribute to attribute set**

Go to: 'Catalog → Attributes → manage Attributes Sets' click on "Default " Attribute set from the Display list

After that drag the 'promotion' attribute from the right 'Unassigned Attribute' list to under the 'General' tab

Then click on "Save Attribute Set" from top-right corner.

Note: if you want to display 'Featured' option to any other Attribute set then assigns promotion attribute to other attribute set.

For More Information visit to belove link: http://inchoo.net/ecommerce/magento/promotion-and-random/

- **Footer Block**

  » **Go to**: 'CMS → Static Blocks' click on "Add New Block" from Right Corner
  Set "footer-block" into 'Identifier' & 'Block Title' Field
  Set   Store View => All Store View
           Status   => Enabled
  Put the following code in to Content area

```
<div class="footer-logo"><img src="{{media url="wysiwyg/category-banner/logo_footer.png"}}"
alt="" /></div>
<div class="footer_top_link">
<ul>
<li class="x-small" title="HOME"><a href="#">HOME</a><span> </span></li>
<li class="x-small" title="MEN"><a href="#">MEN</a><span> </span></li>
<li class="x-small" title="WOMEN"><a href="#">WOMEN</a><span> </span></li>
<li class="x-small" title="KIDS"><a href="#">KIDS</a><span> </span></li>
<li class="x-small" title="ACCESSORIES"><a
href="#">ACCESSORIES</a><span> </span></li>
<li class="x-small" title="FURNITURE"><a href="#">FURNITURE</a><span> </span></li>
<li class="x-small last" title="GIFTS"><a href="#">GIFTS</a></li>
</ul>
</div>
```

- **Footer Page Links**
  - » **Go to**: 'CMS → Static Blocks' click on "Footer Links" Which is Already Existing there.

    Change the following code in to Content area

    ```
    <ul class="about-links">
    <li class="x-small"><a href="{{store direct_url="about-magento-demo-store"}}">About Us</a></li>
    <li class="x-small"><a href="{{store direct_url="customer-service"}}">Customer Service</a></li>
    <li class="last privacy x-small"><a href="{{store direct_url="privacy-policy-cookie-restriction-mode"}}">Privacy Policy</a></li>
    </ul>
    ```

- **Follow Us Block**

  - » **Go to**: 'CMS → Static Blocks' click on "Add New Block" from Right Corner

    Set "followus" into 'Identifier' & 'Block Title' Field

    Set   Store View => All Store View

         Status   => Enabled

    Put the following code in to Content area

    ```
    <div class="follow_button"><a class="btn btn_follow btn_follow_twiter" title="Twitter" href="#"> </a><a class="btn btn_follow btn_follow_fb" title="Facebook" href="#"> </a><a class="btn btn_follow btn_follow_msg" title="Pinterest" href="#"> </a><a class="btn btn_follow btn_follow_in" title="In" href="#"> </a></div>
    ```

Now, **Add Content** to your homepage

- Under '**CMS > Pages**', click on the Home page.
- In the left-hand menu, click **Content**.
- Click the **Show / Hide Editor** button to leave WYSIWYG mode and open the content editor.
  Put the following code in to Content area

    ```
    <div>{{block type="bannerslider/bannerslider" template="bannerslider/bannerslider.phtml"}}</div>
    <div>{{block type="cms/block" block_id="home-block"}}</div>
    ```

- Select **Design** from the left-hand menu. The following page will appear
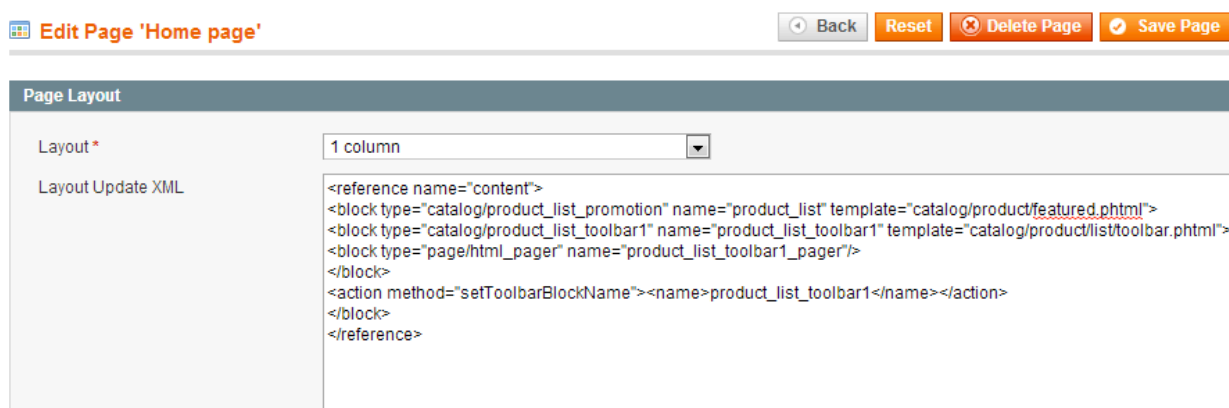

- Select **1 column** from the Layout drop-down menu

    And paste The Following Code into '**Layout Update XML**' area

```
<reference name="content">
<block type="catalog/product_list_promotion" name="product_list"
template="catalog/product/featured.phtml">
<block type="catalog/product_list_toolbar1" name="product_list_toolbar1"
template="catalog/product/list/toolbar.phtml">
<block type="page/html_pager" name="product_list_toolbar1_pager"/>
</block>
<action method="setToolbarBlockName"><name>product_list_toolbar1</name></action>
</block>
</reference>
```

Click the **Save Page** button

Other Custom Block Setup

- **Category Block**
    - » If you want to add a Custom HTML block to your category / product listing page you need to

    - » **Go to**: 'CMS → Static Blocks' click on "Add New Block" from Right Corner

        Set "categoryname-block"* into 'Identifier' & 'Block Title' Field

        Set   Store View => All Store View

                Status   => Enabled

        Put the following code in to Content area

        <p></p>

To apply this block to category

    » **Go to**: ' Catalog → Manage Categories' click on categoryname* from left menu and under 'Display Settings'

        Set Display Mode > Static Block And Products

            CMS Block > categoryname-block

Note: *"category name" is a name of category. You need to replace it with actual category name*

        E.g. Add block with identifier as "Clothes-block" and set it as CMS Block for category 'Clothes'

- **Custom Menu Block**
  - » If you want to add a Custom HTML block to your Menu you need to

  - » **Go to**: 'CMS → Static Blocks' click on "Add New Block" from Right Corner
    Set "wp_custom_menu_35_w291"* into 'Identifier' & 'Block Title' Field
    Set   Store View => All Store View
         Status   => Enabled
    Put the following code in to Content area

    ```
    <div class="menu-img"><img src="{{media url="wysiwyg/category-
    banner/clothing_banner.jpg"}}" alt="" /></div>
    <div class="menu-block">
    <h2 class="medium">Custom Block</h2>
    <p>Lorem ipsum dolor sit amet, consectetuer adipiscing elit. Nam cursus. Morbi ut mi. Nullam
    enim leo, egestas id, condimentum at, laoreet mattis, massa. Sed eleifend nonummy diam.
    Praesent mauris ante, elementum et, bibendum at, posuere sit amet.</p>
    </div>
    ```

Note: *"35" is a ID of your category. You need to replace it with your actual category ID*
       "291" is a width of the block. You need to replace with your requirement. If you don't want use width
       then category name is only "wp_custom_menu_35"
       This block is only valid if you enable Custom Menu

General Information

Block Title *	wp_custom_menu_35
Identifier *	wp_custom_menu_35
Store View *	All Store Views / Main Website / Main Store / English / French / German / Italian
Status *	Enabled

- You can see your custom block as like below screenshot when you hover on category.
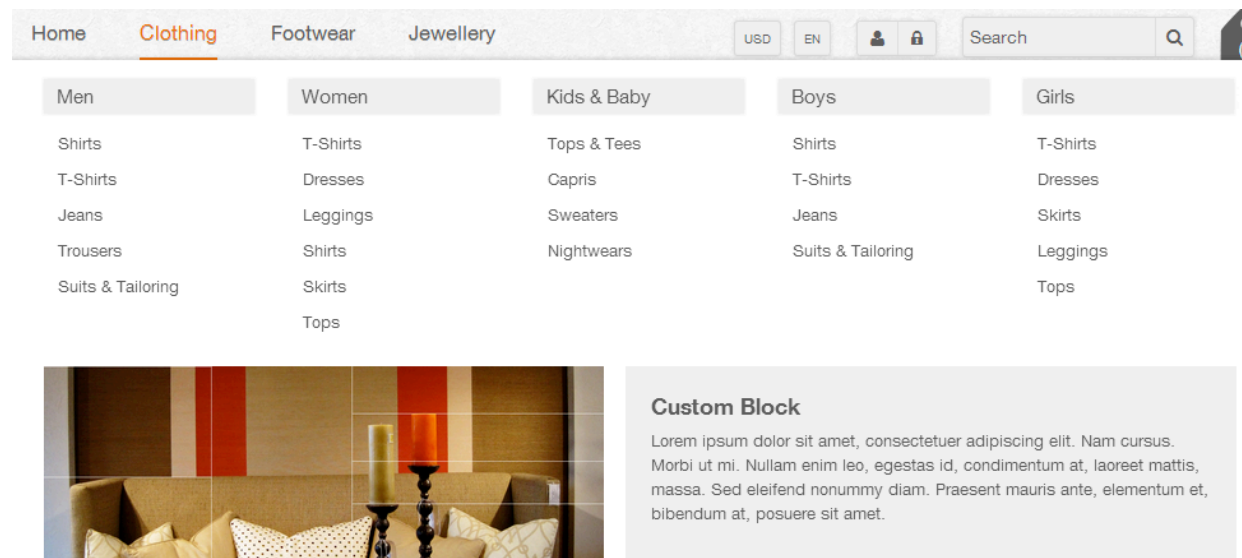

- **Product View Sidebar block**

  » If you want to add a Custom HTML block to your product Detail page you need to
  » **Go to**: 'CMS → Static Blocks' click on "Add New Block" from Right Corner

    Set "detail-block1" into 'Identifier' & 'Block Title' Field
    Set   Store View => All Store View

    Status   => Enabled

    Put the following code in to Content area

    ```
    <div class="customized">
    <h3 class="medium">Customized Area</h3>
    <div class="best_theme">
    <h4 class="medium">Looking for the best theme?</h4>
    <div class="theme_image"><img src="{{media url="wysiwyg/category-banner/detail_banner.jpg"}}" alt=""
    /></div>
    <a class="button" title="best theme" href="#"><span class="small">Click to know more</span></a></div>
    </div>
    ```

    Note: *This block will displayed only when product detail page layout is set as 'default' or 'vertical'*

- **Product View Custom block**

    » If you want to add a Custom HTML block to end of the product Detail page you need to

Troubleshooting & Support

1. **I'm getting 404 not found when trying to open theme admin pages.**
Log out from Magento admin panel, clear the store cache under var/cache, and log
in again.

2. **After the extension installation the store gives an error, or blank page.** Log out from Magento admin panel.
Change the owner of the extracted extension files to the web server user and set 775 permissions on them. Clear the
store cache and try again.

3. **My configuration changes do not appear on the frontend.**
Clear the store cache under var/cache, clear all browser cookies for your store domain and refresh the page in your
browser.

4. **If you have any question / issue you can contact us any time by sending us an email on peerforest@gmail.com or
ask your question at our support forum http://www.magentothemestudio.com/support**

Using Magento

Helpful Resources

There are tutorials, articles, forums and screencasts to help you learn how to use Magento and its features. This section provides helpful links to instructions on commonly used Magento features, but you can learn even more by exploring these resources
